

Laboratory-based Virology Weekly Report

Week 14 ending 6 April 2025

The laboratory-based surveillance for influenza and common respiratory viruses is carried out all-year-around by the New Zealand virus laboratory network consisting of the WHO National Influenza Centre (NIC) at ESR and six hospital laboratories in Auckland (2), Waikato, Wellington, Christchurch and Dunedin. This laboratory network tests specimens ordered by clinicians for hospital inpatients and outpatients during normal clinical practice (serving ~70% of the New Zealand population). In addition, this laboratory network also conducts testing for public health surveillance, including SARI, ILI and WellKiwis (i.e. SHIVERS) cohort surveillance. Furthermore, some of untyped enteroviruses, adenoviruses and respiratory syncytial viruses are referred to ESR for further typing.

Caution is needed in the interpretation:

- 1) Sample collection is ordered by clinicians based on clinical judgement for patient management, rather than a systematic sampling approach for surveillance;
- 2) The number of laboratory tests can be influenced by testing priorities and demands, reagent and resource availability;
- 3) Testing technology and instruments evolve over the years which may have contributed to improved sensitivity for detection in recent years.

Tables and Figures below show the weekly influenza and common non-influenza viruses reported from the laboratory network in 2025. The latest information on COVID-19 cases is available on the Ministry of Health website [here](#)

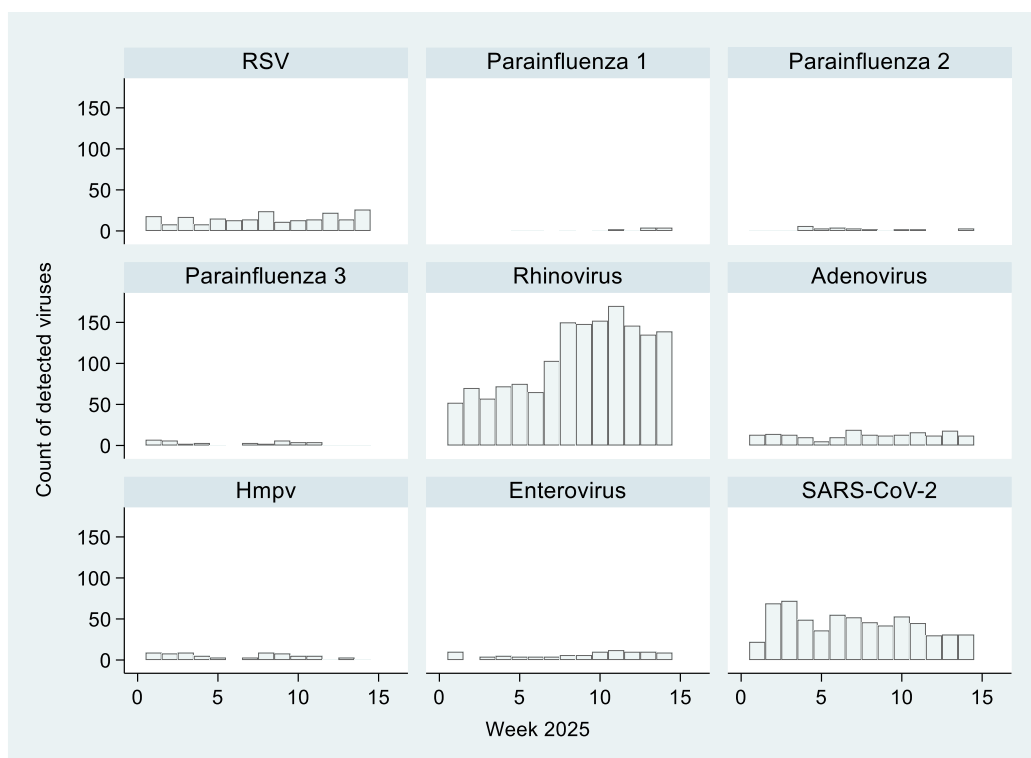

Table 1. Influenza respiratory viruses reported since 1 January 2025

<i>Influenza viruses</i>	Total
No. of positive specimens	795
Influenza A	671
A (not subtyped)	304
A(H1N1)pdm09	244
A(H1N1)pdm09 by PCR	244
A/Victoria/4897/2022 (H1N1)pdm09-like	0
A(H3N2)	123
A(H3N2) by PCR	123
A/Thailand/8/2022 (H3N2)-like	0
Influenza B	124
B (lineage not determined)	114
B/Yamagata lineage	0
B/Yamagata lineage by PCR	0
B/Phuket/3073/2013-like	0
B/Victoria lineage	10
B/Victoria lineage by PCR	10
B/Austria/1359417/2021-like	0

Table 2. Non-influenza respiratory viruses reported since 1 January 2025

<i>Non-influenza respiratory viruses</i>	Total
No. of positive viruses	2812
SARS-CoV-2	633
Respiratory syncytial virus (RSV)	217
Parainfluenza 1 (PIV1)	15
Parainfluenza 2 (PIV2)	29
Parainfluenza 3 (PIV3)	41
Rhinovirus (RV)	1534
Adenovirus (AdV)	180
Human metapneumovirus (hMPV)	69
Enterovirus	94

Figure 1. Non-influenza respiratory viruses reported since 1 January 2025, by week

Numbers for recent weeks are updated due to time lag in receiving laboratory test results.

Figure 2. Influenza viruses reported since 1 January 2025, by week

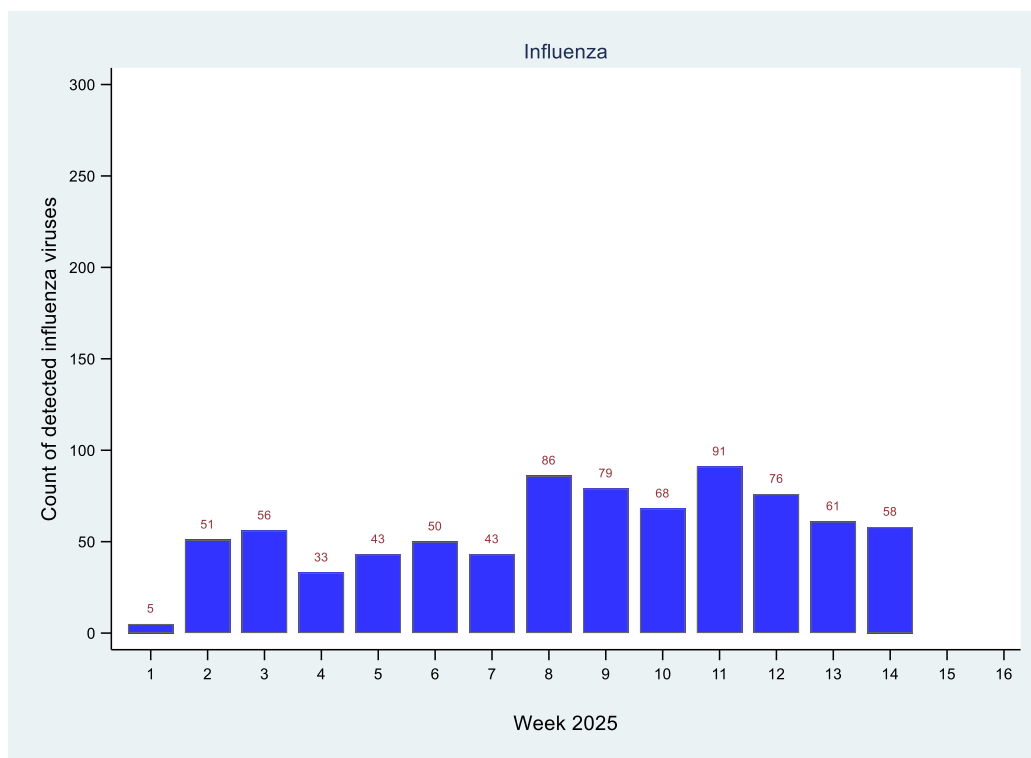

Table 3. Number of adenovirus types since 1 January 2025

<i>Adenovirus type</i>	Month											
	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec
Adenovirus type 37		2										
Adenovirus type 41	8	3										

Table 4. Number of enterovirus types since 1 January 2025

<i>Enterovirus type</i>	Month											
	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec
Coxsackie A virus type 6	8	5	5									

Table 5. Number of respiratory syncytial virus types reported since 1 January 2025

<i>RSV type</i>	Month											
	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec
RSV A	3											
RSV B	2
